Kunal Swami

ksrankawat06@gmail.com || **9024685944** || **LinkedIn** || **GitHub**

Education:

Degree	Year	University / Board	CGPA / Percentage
Bachelor of Technology (B.Tech)	2020-2024	**NSIT, New Delhi**	6.02 CGPA

Experience:

Data Analyst Intern: Hindustan Times, New Delhi (July 2024 – Dec 2024)

- Collaborated with cross-functional teams to derive insights for strategic planning and innovation using **SQL**, **Power BI**, and **Excel**.
- Extracted, cleaned, and analysed large datasets to generate actionable insights for decision-making (**Data Cleaning**, **EDA**).
- Built automated **KPI dashboards** using **SQL**, **Excel**, and **Power BI**, reducing reporting time by 30%.
- **Conducted** *audience analysis* **and** *engagement tracking* **to support** *data-driven marketing strategies*, **and developed** *storytelling dashboards* **using** *Power BI* **to deliver** *actionable, business-critical insights*.

Business and Operations Analyst: Physics Wallah, Gurgaon (Jan 2025 – Present)

- Built and automated interactive dashboards using Metabase, Google Sheets, and Python, reducing manual reporting time and ensuring real-time business visibility.
- Suggested key changes in business and product plans based on insights, contributing to 10% monthly revenue growth and enhanced user experience. Used **SQL** to extract and analyse large datasets, providing actionable business insights.
- Partnered with cross-functional teams to define and track KPIs for PW Talk, improving product performance and user retention.
- Enabled leadership with clear data storytelling, improving decision-making speed and accuracy. Extracted and analyzed critical business data from internal databases to support strategic and operational decisions.

Projects:

Sales Analytics Dashboard (SQL + Power BI):

- SQL scripts to clean, **aggregate**, and structure large datasets, including customer data processing, date dimension modelling, and generating detailed sales summaries.
- Designed and implemented dynamic **Power BI dashboards** to visualize sales trends, product performance, and customer demographics, enabling actionable insights for business decisions.
- Leveraged **SQL**, Power BI, and **data modelling** to create an efficient end-to-end **data analysis** and **visualization** workflow, adhering to best practices in reporting.

Airfare Prediction Model:

- Performed **data cleaning, preprocessing**, and feature engineering using **Python** libraries such as **Pandas** and **NumPy** to prepare the flight price dataset for analysis.
- Created detailed visualizations, including box plots and density graphs, using **matplotlib** and **seaborn** to analyse price variation across airlines and the impact of stops on ticket costs.
- Explored trends and patterns in flight prices by analysing flight frequency by time of day and identifying outliers to ensure accurate insights.

Diabetes Prediction :

- Leveraged **Python** libraries such as **pandas, NumPy, matplotlib** and **seaborn** for **data cleaning, exploratory data analysis**, and uncovering key predictors like glucose, BMI, and age.
- Created insightful visualizations, including distribution plots and heatmaps, to identify patterns and relationships, effectively presenting findings for data-driven decision-making.
- Performed **data cleaning, exploratory data analysis (EDA)**, and feature correlation to uncover patterns and relationships within the data.

Skills:

- **Technical Skills:** SQL, Python, Power BI, C++, Data Structure and Algorithms, DBMS
- **Libraries:** NumPy, Pandas, Matplotlib
- **Frameworks and Skills:** MS-Excel, PowerBI, Tableau and Google Sheets
- **Non-Technical Skills:** Communications, Team Work, Project Management and Business Acumen

Certification :

- Certified in Career Essentials in Data Analysis by **Microsoft** and **LinkedIn**, skilled in **Python, SQL, Power BI,** and **Excel**.
- Certified in Data Analysis with Python and Pandas by Maven Analytics, skilled in Python and pandas.
